Intelligence Reports

Mr. Guthe suggested that more thought be given to the purpose and content of the CIA/RR Economic Intelligence Report. He felt that the trend should be toward the issuance of a larger number of relatively short, concise finished intelligence reports that point up the position and significance from the intelligence point of view of the subject treated in its relation to the total economy. This would not minimize the need for issuing the more comprehensive reports that provide the fuller results of ORR research-in-depth for use of other parts of the intelligence community.

For consideration.
